Join us for a one-day workshop focused on International Financial Reporting Standards for small and medium-sized entities, as recently issued by the International Accounting Standards Board (IASB).

The area of focus will be on an overview of the new standards, challenges and issues, areas requiring clarification, and implementation.

The workshop will also highlight the differences between existing full IFRS, US GAAP, Canadian GAAP, and IFRS for SMEs.

Our morning speaker is **renowned international IFRS expert Karine Benzacar, MBA, CMA, CPA**, who is also a lecturer at the University of Toronto as well as within the CMA Professional Program.

The afternoon session will include a panel discussion with members of the local business community who will lead a discussion using local examples and covering frequently asked questions.
